United States Army

July 2024. "Ready First" gets an A: 1st SBCT to become 1st ABCT June 20, infantry battalions to reflag – Fort Bliss Bugle. Archived from the original on - The United States Army (USA) is the primary land service branch of the United States Department of Defense. It is designated as the Army of the United States in the United States Constitution. It operates under the authority, direction, and control of the United States secretary of defense. It is one of the six armed forces and one of the eight uniformed services of the United States. The Army is the most senior branch in order of precedence amongst the armed services. It has its roots in the Continental Army, formed on 14 June 1775 to fight against the British for independence during the American Revolutionary War (1775–1783). After the Revolutionary War, the Congress of the Confederation created the United States Army on 3 June 1784 to replace the disbanded Continental Army.

The U.S. Army is part of the Department of the Army, which is one of the three military departments of the Department of Defense. The U.S. Army is headed by a civilian senior appointed civil servant, the secretary of the Army (SECARMY), and by a chief military officer, the chief of staff of the Army (CSA) who is also a member of the Joint Chiefs of Staff. It is the largest military branch, and in the fiscal year 2022, the projected end strength for the Regular Army (USA) was 480,893 soldiers; the Army National Guard (ARNG) had 336,129 soldiers and the U.S. Army Reserve (USAR) had 188,703 soldiers; the combined-component strength of the U.S. Army was 1,005,725 soldiers. The Army's mission is "to fight and win our Nation's wars, by providing prompt, sustained land dominance, across the full range of military operations and the spectrum of conflict, in support of combatant commanders". The branch participates in conflicts worldwide and is the major ground-based offensive and defensive force of the United States of America.?

International Space Station

plans to pull out of the ISS program after 2025. However, Russian modules will provide orbital station-keeping until 2028. The US planned in 2009 to deorbit - The International Space Station (ISS) is a large space station that was assembled and is maintained in low Earth orbit by a collaboration of five space agencies and their contractors: NASA (United States), Roscosmos (Russia), ESA (Europe), JAXA (Japan), and CSA (Canada). As the largest space station ever constructed, it primarily serves as a platform for conducting scientific experiments in microgravity and studying the space environment.

The station is divided into two main sections: the Russian Orbital Segment (ROS), developed by Roscosmos, and the US Orbital Segment (USOS), built by NASA, ESA, JAXA, and CSA. A striking feature of the ISS is the Integrated Truss Structure, which connect the station's vast system of solar panels and radiators to its pressurized modules. These modules support diverse functions, including scientific research, crew habitation, storage, spacecraft control, and airlock operations. The ISS has eight docking and berthing ports for visiting spacecraft. The station orbits the Earth at an average altitude of 400 kilometres (250 miles) and circles the

Earth in roughly 93 minutes, completing 15.5 orbits per day.

The ISS programme combines two previously planned crewed Earth-orbiting stations: the United States' Space Station Freedom and the Soviet Union's Mir-2. The first ISS module was launched in 1998, with major components delivered by Proton and Soyuz rockets and the Space Shuttle. Long-term occupancy began on 2 November 2000, with the arrival of the Expedition 1 crew. Since then, the ISS has remained continuously inhabited for 24 years and 297 days, the longest continuous human presence in space. As of August 2025, 290 individuals from 26 countries had visited the station.

Future plans for the ISS include the addition of at least one module, Axiom Space's Payload Power Thermal Module. The station is expected to remain operational until the end of 2030, after which it will be de-orbited using a dedicated NASA spacecraft.

2025 in the United States

Puntland maintains its operations and will not pull out of the region in response to double ongoing operations in the fight against ISIS in Puntland's Bari Region - The following is a list of events of the year 2025 in the United States, as well as predicted and scheduled events that have not yet occurred.

Following his election victory in November 2024, Donald Trump was inaugurated as the 47th President of the United States and began his second, nonconsecutive term on January 20. The beginning of his term saw him extensively use executive orders and give increased authority to Elon Musk through the Department of Government Efficiency, leading to mass layoffs of the federal workforce and attempts to eliminate agencies such as USAID. These policies have drawn dozens of lawsuits that have challenged their legality. Trump's return to the presidency also saw the US increase enforcement against illegal immigration through the usage of Immigration and Customs Enforcement (ICE) as well as deportations, a general retreat from corporate America promoting diversity, equity, and inclusion initiatives, increased support for Israel in its wars against Iran and in Gaza in addition to direct airstrikes against Iran in June, and fluctuating but nevertheless high increases on tariffs across most of America's trading partners, most notably Canada, China, and Mexico.

In January, southern California and particularly Greater Los Angeles experienced widespread wildfires, and the Texas Hill Country experienced devastating floods in July. American news media has paid significantly more attention to aviation accidents, both within American borders as well as one in India involving the American airplane manufacturer Boeing. Furthermore, March witnessed a blizzard spread across the US and Canada, and under both the Biden administration and Trump's HHS secretary Robert F. Kennedy Jr., American companies, politics and culture have paid increasing attention to food coloring as part of the Make America Healthy Again movement.

Final Destination Bloodlines

strategy, giving Bobby a snack containing nuts to trigger a fatal allergic reaction and be subsequently revived. The plan backfires when a malfunctioning MRI - Final Destination Bloodlines is a 2025 American supernatural horror film directed by Zach Lipovsky and Adam Stein from a screenplay by Guy Busick and Lori Evans Taylor, based on a story by Jon Watts, Busick, and Evans Taylor. It is the sixth installment in the Final Destination film series, following Final Destination 5 (2011), and stars Kaitlyn Santa Juana as college student Stefani, who inherits visions of a previous premonition that averted a deadly structural failure of a skyscraper in 1969 from her dying grandmother and is warned by her that Death is coming for their family. Teo Briones, Richard Harmon, Owen Patrick Joyner, Anna Lore, Brec Bassinger, and Tony Todd appear in supporting roles.

After the commercial success of the previous film, a new film entered development, described as a "re-imagining" of the franchise. In March 2020, series producer Craig Perry said the film would be set "in the world of first responders" and in October that year, series creator Jeffrey Reddick confirmed it was the sixth film in the franchise. In January 2022, the film was planned to be released on the streaming service HBO Max, with Lipovsky and Stein as directors and Busick joining Taylor as co-writer for the film. In March 2024, Warner Bros. Pictures announced that the film would instead receive a theatrical release. Filming took place in Vancouver from March to May 2024, following delays due to the SAG-AFTRA strike.

Final Destination Bloodlines was released in the United States by Warner Bros. Pictures on May 16, 2025. The film received generally positive reviews from critics and grossed \$287.2 million worldwide, becoming both the best-reviewed and highest-grossing installment in the franchise. In August 2025, it was announced a sequel was in development, with Taylor writing the script.

Joe Biden

Hayden, Erik (February 3, 2025). "Joe Biden Is Ready to Make Some Hollywood Deals, Signs With CAA". The Hollywood Reporter. Retrieved February 4, 2025 - Joseph Robinette Biden Jr. (born November 20, 1942) is an American politician who was the 46th president of the United States from 2021 to 2025. A member of the Democratic Party, he represented Delaware in the U.S. Senate from 1973 to 2009 and served as the 47th vice president under President Barack Obama from 2009 to 2017.

Born in Scranton, Pennsylvania, Biden graduated from the University of Delaware in 1965 and the Syracuse University College of Law in 1968. He was elected to the New Castle County Council in 1970 and the U.S. Senate in 1972. As a senator, Biden chaired the Senate Judiciary Committee and Foreign Relations Committee. He drafted and led passage of the Violent Crime Control and Law Enforcement Act and the Violence Against Women Act. Biden also oversaw six U.S. Supreme Court confirmation hearings, including contentious hearings for Robert Bork and Clarence Thomas. He opposed the Gulf War in 1991 but voted in favor of the Iraq War Resolution in 2002. Biden ran unsuccessfully for the 1988 and 2008 Democratic presidential nominations. In 2008, Obama chose him as his running mate, and Biden was a close counselor to Obama as vice president. In the 2020 presidential election, Biden selected Kamala Harris as his running mate, and they defeated Republican incumbents Donald Trump and Mike Pence.

As president, Biden signed the American Rescue Plan Act in response to the COVID-19 pandemic and subsequent recession. He signed bipartisan bills on infrastructure and manufacturing. Biden proposed the Build Back Better Act, aspects of which were incorporated into the Inflation Reduction Act that he signed into law in 2022. He appointed Ketanji Brown Jackson to the Supreme Court of the United States. In his

foreign policy, the U.S. reentered the Paris Agreement. Biden oversaw the complete withdrawal of U.S. troops that ended the war in Afghanistan, leading to the Taliban seizing control. He responded to the Russian invasion of Ukraine by imposing sanctions on Russia and authorizing aid to Ukraine. During the Gaza war, Biden condemned the actions of Hamas as terrorism, strongly supported Israel, and sent limited humanitarian aid to the Gaza Strip. A temporary ceasefire proposal he backed was adopted shortly before his presidency ended.

Concerns about Biden's age and health persisted throughout his term. He became the first president to turn 80 years old while in office. He began his presidency with majority support, but saw his approval ratings decline significantly throughout his presidency, partially due to public frustration over inflation, which peaked at 9.1% in June 2022 before dropping to 2.9% by the end of his presidency. Biden initially ran for reelection and, after the Democratic primaries, became the party's presumptive nominee in the 2024 presidential election. After his performance in the first presidential debate, renewed scrutiny from across the political spectrum about his cognitive ability led him to withdraw his candidacy. In 2022 and 2024, Biden's administration was ranked favorably by historians and scholars, diverging from unfavorable public assessments of his tenure. The only president from the Silent Generation, he is the oldest living former U.S. president and the oldest person to have served as president.

George W. Bush

wouldn't hand over bin Laden to the U.S." CNN. Archived from the original on December 14, 2016. Retrieved September 12, 2016. "US pulls out of Saudi Arabia". - George Walker Bush (born July 6, 1946) is an American politician and businessman who was the 43rd president of the United States from 2001 to 2009. A member of the Republican Party and the eldest son of the 41st president, George H. W. Bush, he served as the 46th governor of Texas from 1995 to 2000.

Born into the prominent Bush family in New Haven, Connecticut, Bush flew warplanes in the Texas Air National Guard in his twenties. After graduating from Harvard Business School in 1975, he worked in the oil industry. He later co-owned the Major League Baseball team Texas Rangers before being elected governor of Texas in 1994. As governor, Bush successfully sponsored legislation for tort reform, increased education funding, set higher standards for schools, and reformed the criminal justice system. He also helped make Texas the leading producer of wind-generated electricity in the United States. In the 2000 presidential election, he won over Democratic incumbent vice president Al Gore while losing the popular vote after a narrow and contested Electoral College win, which involved a Supreme Court decision to stop a recount in Florida.

In his first term, Bush signed a major tax-cut program and an education-reform bill, the No Child Left Behind Act. He pushed for socially conservative efforts such as the Partial-Birth Abortion Ban Act and faith-based initiatives. He also initiated the President's Emergency Plan for AIDS Relief, in 2003, to address the AIDS epidemic. The terrorist attacks on September 11, 2001 decisively reshaped his administration, resulting in the start of the war on terror and the creation of the Department of Homeland Security. Bush ordered the invasion of Afghanistan in an effort to overthrow the Taliban, destroy al-Qaeda, and capture Osama bin Laden. He signed the Patriot Act to authorize surveillance of suspected terrorists. He also ordered the 2003 invasion of Iraq to overthrow Saddam Hussein's regime on the false belief that it possessed weapons of mass destruction (WMDs) and had ties with al-Qaeda. Bush later signed the Medicare Modernization Act, which created Medicare Part D. In 2004, Bush was re-elected president in a close race, beating Democratic opponent John Kerry and winning the popular vote.

During his second term, Bush made various free trade agreements, appointed John Roberts and Samuel Alito to the Supreme Court, and sought major changes to Social Security and immigration laws, but both efforts

failed in Congress. Bush was widely criticized for his administration's handling of Hurricane Katrina and revelations of torture against detainees at Abu Ghraib. Amid his unpopularity, the Democrats regained control of Congress in the 2006 elections. Meanwhile, the Afghanistan and Iraq wars continued; in January 2007, Bush launched a surge of troops in Iraq. By December, the U.S. entered the Great Recession, prompting the Bush administration and Congress to push through economic programs intended to preserve the country's financial system, including the Troubled Asset Relief Program.

After his second term, Bush returned to Texas, where he has maintained a low public profile. At various points in his presidency, he was among both the most popular and the most unpopular presidents in U.S. history. He received the highest recorded approval ratings in the wake of the September 11 attacks, and one of the lowest ratings during the 2008 financial crisis. Bush left office as one of the most unpopular U.S. presidents, but public opinion of him has improved since then. Scholars and historians rank Bush as a below-average to the lower half of presidents.

Hurricane Helene

warnings also extended further inland due to Helene's fast motion. The storm caused catastrophic rainfall-triggered flooding, particularly in western North - Hurricane Helene (heh-LEEN) was a deadly and devastating tropical cyclone that caused widespread catastrophic damage and numerous fatalities across the Southeastern United States in late September 2024. It was the strongest hurricane on record to strike the Big Bend region of Florida, the deadliest Atlantic hurricane since Maria in 2017, and the deadliest to strike the mainland U.S. since Katrina in 2005.

The eighth named storm, fifth hurricane, and second major hurricane of the 2024 Atlantic hurricane season, Helene began forming on September 22, 2024 as a broad low-pressure system in the western Caribbean Sea. By September 24, the disturbance had consolidated enough to become a tropical storm as it approached the Yucatán Peninsula, receiving the name Helene from the National Hurricane Center. Weather conditions led to the cyclone's intensification, and it became a hurricane early on September 25. More pronounced and rapid intensification ensued as Helene traversed the Gulf of Mexico the following day, reaching Category 4 intensity on the evening of September 26. Late on September 26, Helene made landfall at peak intensity in the Big Bend region of Florida, near the city of Perry, with maximum sustained winds of 140 mph (220 km/h). Helene weakened as it moved quickly inland before degenerating to a post-tropical cyclone over Tennessee on September 27. The storm then stalled over the state before dissipating on September 29.

In advance of Helene's landfall, states of emergency were declared in Florida and Georgia due to the significant impacts expected, including very high storm surge along the coast and hurricane-force gusts as far inland as Atlanta. Hurricane warnings also extended further inland due to Helene's fast motion. The storm caused catastrophic rainfall-triggered flooding, particularly in western North Carolina, East Tennessee, and southwestern Virginia, and spawned numerous tornadoes. Helene also inundated Tampa Bay, breaking storm surge records throughout the area. The hurricane had a high death toll, causing 252 deaths and inflicting an estimated total of \$78.7 billion in damage, making it the fifth-costliest Atlantic hurricane on record adjusted for inflation.
