AllMusic - God Fodder is the debut studio album by English rock band Ned's Atomic Dustbin, released on 1 April 1991 by Columbia Records. After creating their own imprint following the success of several prior independent singles, the band recorded the album from December 1990 to January 1991 in London. Musically, God Fodder takes large influence from grebo, shoegaze, noise pop, and dance music, characterized by noisy guitars, complex drum beats, and its usage of two bass players, with Matt Cheslin playing regular bass lines and Alex Griffin playing harmonic bass lines. Lyrically, the album features communal efforts written by all the band.

Five different singles were released from God Fodder across different regions. Upon its release, the album was a critical and commercial success, reaching number 4 in the UK Albums Chart; it also found an audience in the United States, where the album reached number 91 on the Billboard 200, largely due to the band's T-shirt campaign and the videos for "Kill Your Television" and "Grey Cell Green", which gained traction on MTV's 120 Minutes. The record's success is said to be a triumph against the dominance of grunge music at the time. The album was named among the year's best albums by several magazines. The band played the album in its entirety for the first time in O2 Shepherd's Bush Empire in December 2009 and played it again in Birmingham in September 2010.

It was produced by Abrams herself, along with American musician Aaron Dessner, whom she had first collaborated with on her debut studio album, *Good Riddance* (2023). Abrams wrote most of the songs with either Dessner or her frequent co-writer Audrey Hobert. Musically, *The Secret of Us* is a pop record that contains elements of country pop, indie pop, and folk music.

Two singles—"Risk" and "Close to You"—preceded the album's release. "I Love You, I'm Sorry" was released as the third single in October 2024. American singer-songwriter Taylor Swift, who is often cited by Abrams as an artistic influence, appears on the track "Us" as a featured guest.

The Secret of Us topped the charts in Australia, Canada, the Netherlands, Scotland, and the United Kingdom. In the United States, the album debuted at number two on the Billboard 200, becoming her first top 10 album. To support the album, Abrams embarked on her fourth concert tour, the Secret of Us Tour, in September 2024. deluxe edition of The Secret of Us was released on October 18, 2024, alongside the single "That's So True", which topped the UK Singles Chart. Following this, in July 2025 she started her second leg of the North American leg, calling it the "The Secret of Us Deluxe Tour".

Normal mode

motion described by the normal modes takes place at fixed frequencies. These fixed frequencies of the normal modes of a system are known as its natural frequencies - A normal mode of a dynamical system is a pattern of motion in which all parts of the system move sinusoidally with the same frequency and with a fixed phase relation. The free motion described by the normal modes takes place at fixed frequencies. These fixed frequencies of the normal modes of a system are known as its natural frequencies or resonant frequencies. A physical object, such as a building, bridge, or molecule, has a set of normal modes and their natural frequencies that depend on its structure, materials and boundary conditions.

The most general motion of a linear system is a superposition of its normal modes. The modes are "normal" in the sense that they move independently. An excitation of one mode will never cause excitation of a different mode. In mathematical terms, normal modes are orthogonal to each other.
